

**SBI Distribution Inc.**, a modern import distribution company replaced the individual operations of Spring Garden Foods Inc., Interage Limited and Supermarket Investments Inc. With the merger of the operations of these companies, SBI Distribution Inc. established a foothold in the wholesale industry through increased brand representation including the addition of a core of international brands.

The company imports and distributes:

- food products
- wines and spirits
- general merchandise
- confectionary
- pharmaceutical products
- health and beauty products

While strong in all of these categories, the company has developed a special reputation for its range of fine wines. It has also created its own in-house brand for food items under the "Home" label.

***David Smith Director of Operations***

*Since the implementation of the Accellos One WMS in October 2007, SBI has significantly improved performance in all areas of our warehouse operations. Efficiency and effectiveness have been improved through better utilisation of our human and other resources. Increased speed and accuracy in our order fulfillment and the visibility gained on the entire warehouse operation has greatly improved the quality of our customer service. Our suppliers have gained greater confidence in our ability to manage their product since we are able, for the first time, to track and report specific product attributes such as expiry dates and lot numbers.*

***Overall the decision to implement the Accellos One WMS has placed SBI Distribution Inc. light years ahead of our competition in this market and has made us the distributor of choice.***
